

BALLZ QR SKEWER FIT GUIDE

IMPORTANT: This guide is intended for axles used with the Coho XC cargo trailer

1. Print this sheet on a standard 8.5"x11" letter sheet. Verify that the illustrations are to scale by using this ruler.

2. Measure the length of your current axle using this illustration. Measure to the end of the axle. Ensure quick release lever is in the closed position.

3. Use the axle length to determine which model of Ballz QR Skewer you will need.

If your axle length is not shown, we do not have a compatible Ballz QR Skewer for you at this time.

Measured Axle Length	Compatible Ballz QR Skewer	SKU
138-168mm	Standard 126-135mm	960219
170-200mm	Long 170mm	960222
190-220mm	Long 190mm	960220
